

**WHAT IS CLAIMED IS:**

1. A tool holder comprising:
  - a holding portion used to hold a tool; and
  - a specification marking member for marking thereon a
- 5 specification corresponding to the specification of the tool;
  - wherein said specification marking member is formed
  - of a retaining portion extending from said holding portion, and a
  - marking portion removably located in said retaining portion.
2. The tool holder as defined in claim 1, wherein said
- 10 retaining portion is provided in an upper side with a first
- locating element; wherein said marking portion is provided in an
- underside with a second locating element whereby said marking
- portion is removably located in said retaining portion in such a
- manner that said second locating element of said marking
- 15 portion is separably engaged with said first locating element of
- said retaining portion.
3. The tool holder as defined in claim 2, wherein said
- first locating element of said retaining portion is a locating
- projection; wherein said second locating element of said
- 20 marking portion is a locating groove.
4. The tool holder as defined in claim 2, wherein said
- first locating element of said retaining portion is a locating
- groove; wherein said second locating element of said marking
- portion is a locating projection.
